

# Cut costs and never miss a call

A next-generation voice service to help you reduce cost, increase business agility and resilience.

SmartNumbers enables your business to expand without the need to increase office space and other costs at the same rate.

### Desk Sharing

Enables staff to share desks by hot-desking across the office. Their calls are routed to whichever desk they are working at, and may include home, mobile or international locations. For added convenience Dual-Ring can ring both desk and mobile phones at the same time

### Choice of Numbers

Advertise a local, regional or global presence with your choice of telephone numbers, all delivered to wherever your staff are working

### Unified Messaging

Automatically delivers all your voicemail and faxes directly to your email account. A web-based portal allows you to manage your call setup and will show you all your missed calls and important call data

### Fax to Email

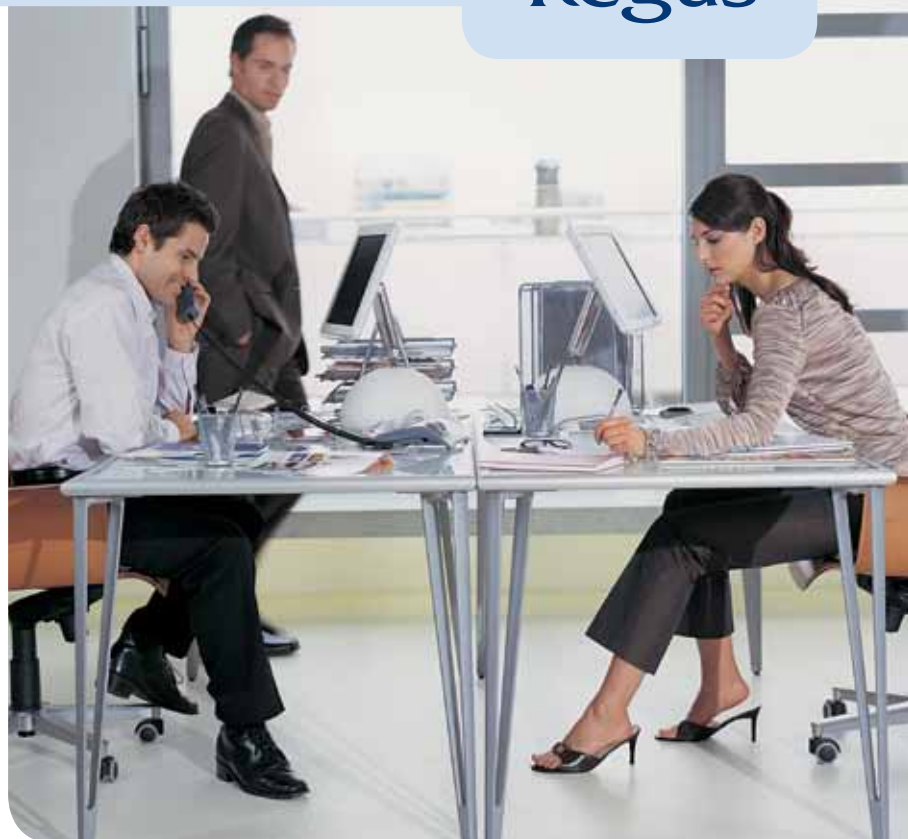

As part of the service you are also given a separate fax number, which when you receive a fax, will instantly and automatically deliver this to you through email

### Business Continuity Built In

Should a business disaster prevent you from reaching your Regus office, you can divert your calls to wherever you may be working

### A Number for Life

If in the future you expand outside of the Regus network, you can continue to use the service at the monthly fee

only

**£9.95**  
per month

To start benefiting from Regus SmartNumbers today, call **0844 778 3000** or visit [regussmartnumbers.com](http://regussmartnumbers.com)

## Choose a Number Type

You have a choice of numbers you can use for your Regus SmartNumbers service:

<b>Local</b>	A local number anywhere in the UK. Take several numbers in different towns to present a UK-wide presence
<b>0844</b>	A non-geographic number to which callers are charged national call rates
<b>0845</b>	A non-geographic number to which callers are charged local call rates
<b>0800</b>	A free-phone number which allows your customers to fax you, without them incurring any call costs

Calls to these numbers can reach you at your Regus desk, your home, mobile or other location you specify.

## Low cost or free call delivery

When a call is made to your SmartNumber, Regus will deliver this call to wherever you are working in the UK with the following low-cost or even free call delivery charge:

<b>Local</b>	3p per minute
<b>0844</b>	FREE
<b>0845</b>	1.5p per minute
<b>0800</b>	5p per minute

If you're working overseas or on your mobile phone, then call delivery costs will increase.

“Regus SmartNumbers enables my business to present a UK-wide presence, even though I’m working from one Regus office in Slough.”

“With my Regus SmartNumber we have been able to introduce desk-sharing across our business. We can take it in turns to work from home or from the Regus centre and our calls reach us automatically no matter where we work.”

“We were able to cut costs by taking a smaller office and using SmartNumbers to hot-desk across Regus offices and home locations.”

“The Unified Messaging features are great – I get all my voicemails, faxes and even missed call alerts delivered straight into my email account.”

“We adopted SmartNumbers as part of our business continuity planning. We know that if a pandemic or other event disrupted our business then we can send staff home and business continues as normal.”
